

Healthy Northern Communities 2013

Prince Rupert

Revised
September 24, 2013

northern health
the northern way of caring

What Determines Health?

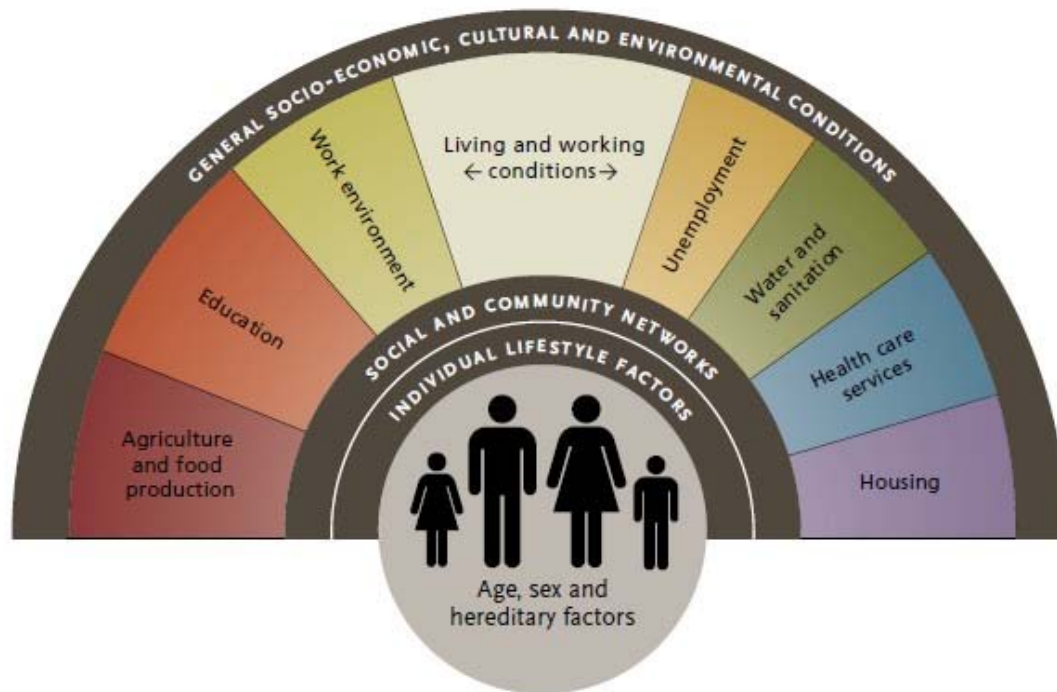

Figure: Health Council of Canada, 2010.

Broadly speaking: a good strong start in life; early and enriching experiences; educational opportunities; a sufficient and equitable distribution of employment, income, housing and food; water and sanitation; our interactions with the environment; our choices towards certain lifestyles and risks; our age and sex; genetics; as well as access to appropriate high quality health care are some of the many factors that are known to influence our health.

The City of Prince Rupert was incorporated in 1910 and is located on the north coast approximately 1,507 km northwest of Vancouver and 721 km west of Prince George.¹

Prince Rupert is situated within the Skeena-Queen Charlotte Regional District, within the Prince Rupert Local Health Area (LHA 052) and the Northwest Health Service Delivery Area of Northern Health. The Prince Rupert area is served by School District No. 52.

This area is the traditional territories of the Tsimshian peoples. Metlakatla, a Tsimshian community is accessed via ferry from Prince Rupert. Others such as Lax Kw'alaams, Gitxaala and Giga'at are only accessible by float plane or boat, weather permitting.^{2, 3}

The estimated 12,913 people within the City of Prince Rupert account for approximately 90 % of the Prince Rupert LHA population (12,913 /14,284 persons) and for 66.6 % of the Skeena-Queen Charlotte Regional District population (12,913 /19,375 persons).^{4, 5, 6}

During the 2011 calendar year, there were 166 live births, 89 deaths and 49 marriages to residents of Prince Rupert LHA. Of these, 150 live births, 80 deaths and 44 marriages could be attributed to City of Prince Rupert residents. The life expectancy for both populations was 78.7 years: less than the British Columbia (BC) average of 82 years.⁷

Selected Community Indicators

Demographics	LHA	BC
Percent of population 0 – 19 yrs old (Census 2011 / PEOPLE 2013)	27	21
Percent of population ages 65+ (Census 2011 / PEOPLE 2013)	11	15
Percent of population Visible Minorities	9.9	24.5
Percent of population Aboriginal Identity	38.9	4.8
Income		
Percent of families earning < \$20,000 per year	12.0	8.0
Percent of families earning from \$20,000 - \$80,000 per year	55.0	53.8
Percent of families earning > \$80,000 per year	33.0	38.1
* Percent of population receiving Income Assistance > 1 yr.	4.1	1.0
Early Development and Educational Achievement		
Percent of kindergarten children vulnerable: 1 or more EDI scales	48.1	28.6
† Percent of Grade 4 & 7 students below standard on FSA - Reading	36.0	20.7
† Percent of Grade 4 & 7 students below standard on FSA - Writing	28.8	17.9
† Percent of Grade 4 & 7 students below standard on FSA - Math	44.7	23.4
† Percent of 18 yr olds who did not graduate	45.6	29.0
Percent of persons ages 25 to 54: without high school completion	25.0	11.1
Percent of persons ages 25 to 64: with university degree or above	13.7	24.1
Housing		
Percent of households that are renting	37	30.4
Percent of tenants paying 30 % or more of income towards housing	32.7	43.4
Percent of owners paying 30 % or more of income towards housing	18.3	22.7
Children and Youth at Risk		
* Children (ages <15) receiving Income Assistance > 1 year	8.1	1.7
* Youth (ages 15 - 24) receiving Income Assistance > 1 yr	3.3	0.9
Children in care rate per 1,000 population, ages 0 – 18	22.5	9.2
Teen pregnancies per 1,000 women ages 15 – 19 (2007-2009)	64.0	26.3
Other Indicators		
Alcohol sales per capita in 2010 (Dollars Spent)	972	790
Alcohol sales per capita in 2010 (Litres Consumed)	156	107
nca = means this level of data detail or data aggregation is "not currently available."		
* Income Assistance figures may be understated as they do not include Aboriginal people who are living on reserve.

Population Forecasts (with a focus on seniors)

Although the percentage of seniors in northern BC is the smallest of all the health regions, this group is expected to grow quickly over the next 15 years. From 2015 to 2030, the 65+, 75+ and 85+ populations in northern BC are expected to grow by 78 %, 111 % and 106 % respectively: the highest overall seniors' growth rates in BC's health authorities.⁸

Below is a forecast of what we might expect at the local health service delivery levels.

Prince Rupert Local Health Area: Population Projection						Population Change 2015 - 2030	
Broad Age Groups	2010	2015	2020	2025	2030	number	%
<20	3,833	3,587	3,518	3,446	3,341	-246	-6.9
20-44	4,597	4,659	4,660	4,760	4,914	255	5.5
45-64	4,300	4,338	4,284	3,918	3,577	-761	-17.5
65+	1,629	1,988	2,554	3,220	3,698	1,710	86.0
Total Population	14,359	14,572	15,016	15,344	15,530	958	6.6
Focus on Seniors	2010	2015	2020	2025	2030	number	%
65+	1629	1988	2554	3220	3698	1,710	86.0
75+	645	711	890	1171	1508	797	112.1
85+	175	214	260	294	363	149	69.6
90+	76	88	125	139	153	65	73.9

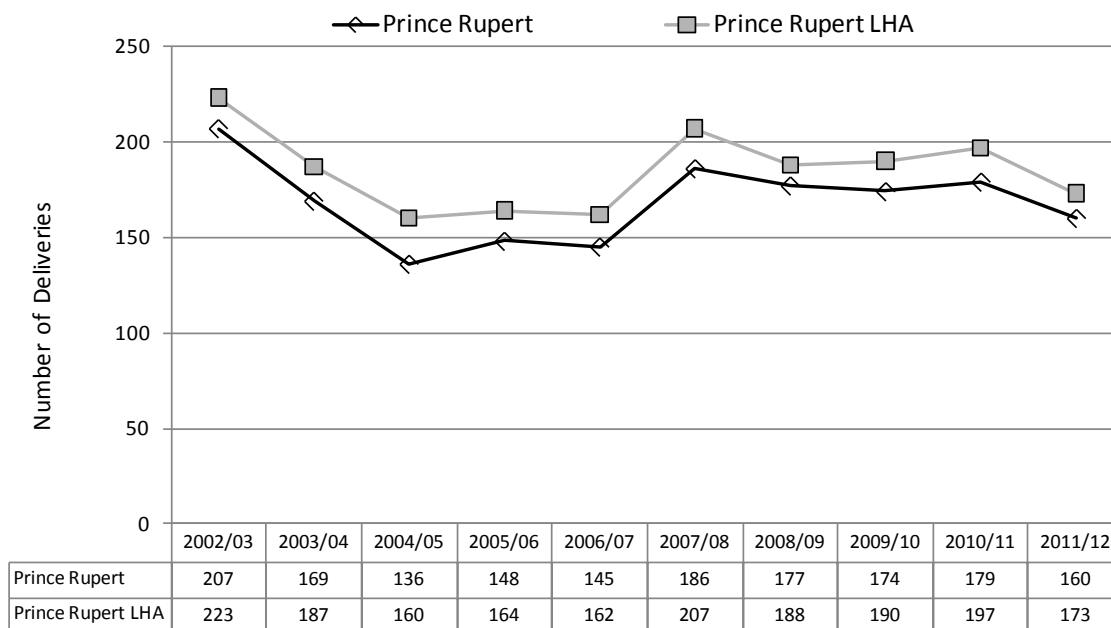

Northwest Health Service Delivery Area: Population Projection						Population Change 2015 - 2030	
Broad Age Groups	2010	2015	2020	2025	2030	number	%
<20	20,042	18,491	17,763	17,227	16,745	-1,746	-9.4
20-44	23,639	23,426	23,271	23,475	23,786	360	1.5

65+	8,798	11,205	14,285	17,477	19,898	8,693	77.6
75+	3,405	4,110	5,397	7,068	8,940	4,830	117.5
85+	837	1,207	1,548	1,821	2,384	1,177	97.5
90+	307	435	706	820	939	504	115.9

About these Population Forecasts: These projections incorporate the known trends in terms of births, deaths, migration, fertility, age-group (cohort) survival etc. The extra populations that "might" result from the many anticipated projects in the north are not yet explicitly considered. At best, these projections reflect a base-case of what our future population might look like if currently known trends continue into the future. For methodological reasons, these forecasts are not produced at the community level.

A Good Strong Start in Life is more likely if infants, children and all family members are as healthy as possible. In thinking about this we consider many factors including trends in the number of mothers delivering babies and the locations where the infants are delivered.

This type of information informs services such as prenatal education, parenting skills programs, post delivery follow-ups for moms, immunizations, and the many childhood screening services that are intended to detect and address vision, hearing and dental health concerns.

Deliveries per year by Prince Rupert City and Prince Rupert LHA mothers: ⁹

Delivery locations for Prince Rupert area mothers (five year summary). ¹⁰

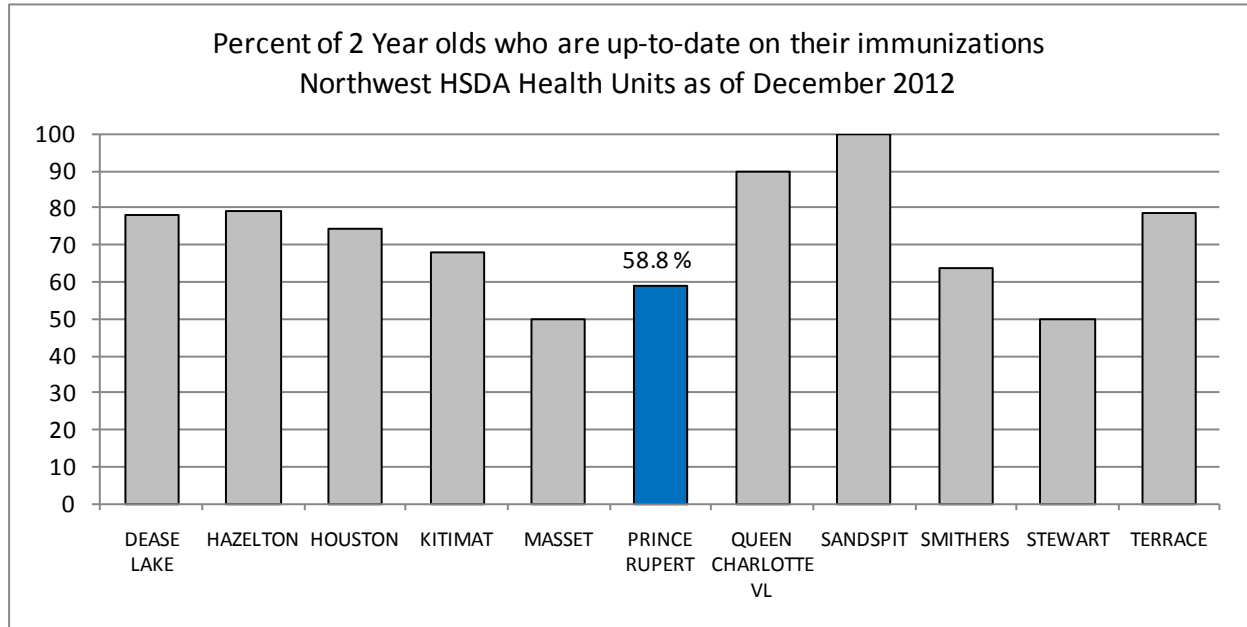

Mom's Home Community	Delivery Location: 2007/08 – 2011/12					Total Deliveries
	Prince Rupert Hospital	Mills Memorial Hospital	UHNBC	Bulkley Valley Hospital	Other BC Location	
Lax Kw'alaams (VL)	52	1	0	0	1	54
Port Edward (DM)	23	0	0	0	0	23
Prince Rupert (City)	839	7	4	1	25	876
Total Deliveries	914	8	4	1	26	953

Mothers from remote communities

Prince Rupert Regional Hospital is the destination for many mothers who reside in isolated west coast communities. Of the many births in the Prince Rupert Regional Hospital between 2007/08 and 2011/12: there were 45 births to mothers from Haida Gwaii; 52 births to mothers from [Lax Kw'alaams](#); 30 births to mothers from the [Gitxaala Nation](#) (Kitkatla); and, 12 births to mothers from the [Gitga'at Nation](#) (Hartley Bay).

Immunizations are some of the best health investments that we can make. Along with better sanitation and clean drinking water, immunizations have been responsible for the huge increases in life expectancy that we have seen around the world. ^{11, 12}

Because immunizations are such a good investment and the protection they provide to individuals and communities as a whole is so important, we actively monitor whether certain target populations are fully immunized. For example, we know that the percent of 2 year old children in the Prince Rupert area, who are up-to-date with their immunizations, is 58.8 %. ¹³

The above graph represents children who were born during the year 2010 and who were two years of age as of Dec 31st, 2012. To be considered as up-to-date for their age, two year old children must have completed the following immunizations by their second birthday:

- 4 doses of DTP vaccine
- 3 doses of Polio vaccine
- 3 doses of Hepatitis B vaccine
- 1 dose each of Measles, Mumps and Rubella vaccines
- at least 2 doses of Pneumococcal conjugate vaccine
- at least 1 dose of Meningococcal conjugate vaccine
- at least 1 dose of Haemophilus Influenza B vaccine after month 15
- 1 dose of Varicella (chicken-pox) vaccine or past disease by the 2nd birthday

- Note: DTP = Diphtheria, Tetanus and Pertussis (whooping cough).

Vaccine Preventable Diseases (VPD) are illnesses that may have been avoided if individuals and communities were sufficiently immunized. Many of these diseases have lifelong impacts.

This page presents a summary of the most frequently reported Vaccine Preventable Diseases for the Northwest Health Service Delivery Area.

Vaccine Preventable Disease Cases in Northwest BC: 2002 - 2012

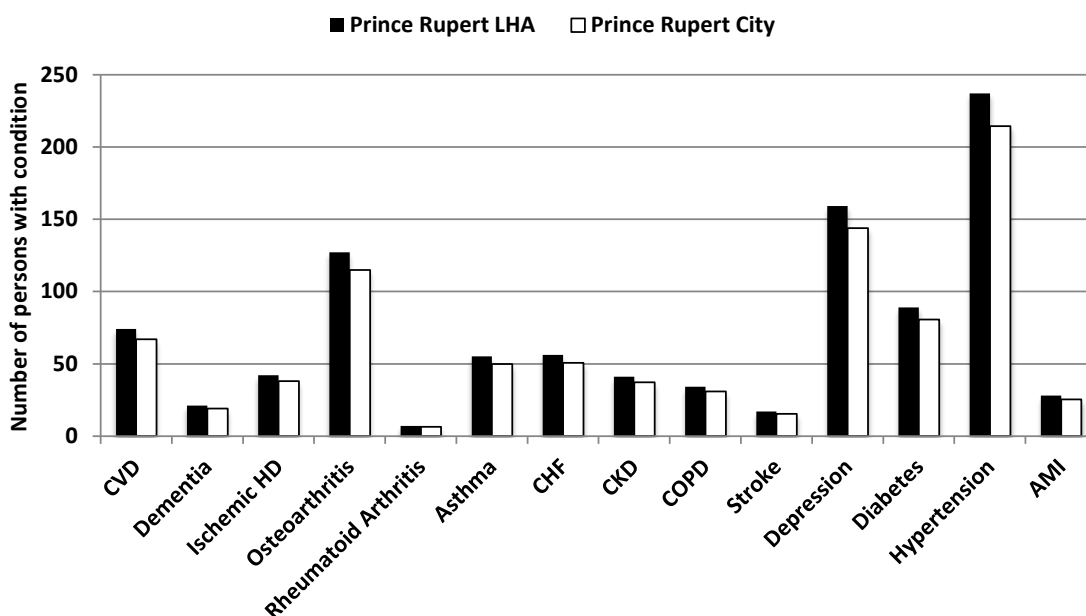

VPD in Northwest BC: Cases by Community 2002 - 2012 ¹⁴												
Community	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011	2012	Total
Dease Lake	0	1	0	0	0	1	0	0	0	0	0	2
Hazelton	1	8	0	0	1	3	2	1	2	0	0	18
Houston	14	1	2	0	0	0	2	0	0	0	0	19
Kitimat	1	2	1	0	0	0	0	2	0	2	1	9
Masset	1	1	0	0	0	1	1	0	0	2	3	9
Prince Rupert	8	4	0	7	5	4	2	2	8	9	5	54
QC Village	0	0	1	0	0	2	2	0	0	0	0	5
Smithers	9	1	1	2	4	4	25	2	1	3	4	56
Stewart	0	0	0	0	0	0	1	0	0	0	0	1
Terrace	3	5	0	3	3	2	4	3	2	3	7	35
Total	37	23	5	12	13	17	39	10	13	19	20	208

From 2002 to 2012, the most frequently reported VPDs in the Northwest HSDA were:

- Hepatitis B - 75 cases
- Pertussis (whooping cough) - 68 cases
- Invasive Pneumococcal Disease - 47 cases
- Invasive Meningococcal disease – 8 cases
- Haemophilus Influenza B – 7 cases.

Chronic Diseases tend to accumulate with age and limit our independence. Our personal choices towards a handful of well known risk factors: tobacco use; physical inactivity; poor dietary choices; obesity; inappropriate alcohol and drug use; certain sexual activities; and, excessive sun exposure can greatly determine how we age and whether we remain free from certain types of cancers and chronic illnesses. ^{15, 16, 17, 18}

**Estimated numbers of new cases of chronic conditions
Prince Rupert LHA and Prince Rupert City residents: 2010-2011**

Chronic Conditions	Existing or treated cases		New cases / yr		Cost per patient / year
	Prince Rupert City	LHA	Prince Rupert City	LHA	
Cardiovascular Disease (CVD)	626	693	67	74	\$8,493
Dementia	94	104	19	21	\$12,613
Ischemic Heart Diseases (IHD)	466	515	38	42	\$7,436
Osteoarthritis	1784	1973	115	127	\$3,601
Rheumatoid Arthritis	145	160	6	7	\$4,870
Asthma	1035	1145	50	55	\$1,286
Congestive Heart Failure (CHF)	315	349	51	56	\$11,595
Chronic Kidney Disease (CKD)	218	241	37	41	\$13,490
COPD	244	270	31	34	\$10,308
Stroke	109	121	15	17	\$10,106
Depression	3412	3774	144	159	\$2,635
Diabetes	1070	1184	80	89	\$5,112
Hypertension	2788	3084	214	237	\$3,767
AMI	205	227	25	28	\$9,548

Community level estimates are based upon each community's relative share of the total Local Health Area (LHA) population and reflect what "might be expected" at the community level.

Healthy and independent seniors are what we want to see when we look around the communities in northern BC. The population however, is aging and with that often comes an accumulation of chronic health conditions that inhibit our independence.

Home support and other services provided by Northern Health intend to keep people healthy and independent. As of March 2013, there were 449 northwest BC residents receiving long-term home-support services. Here is an abbreviated profile of these residents.¹⁹

Male	36 %	Married	23 %	Aged 75+	67 %
Female	64 %	Widowed	46 %	Aboriginal	23 %
Frequently Noted Health Conditions					
Hypertension	61 %	Diabetes	26 %	Any Psychiatric Diagnosis	24%
Arthritis	51 %	Chronic Arterial	24 %	Osteoporosis / Cataract	22%
Clients with Multiple Health Conditions					
≤ 3 Conditions	25 %	3 - 5 Conditions	35 %	≥5 Conditions	40 %
Clients with Cognitive Impairment (Cognitive Performance Score)					
No impairment	48 %	Borderline /mild	42 %	Moderate	6 %
Clients with independence difficulty in 1- 3 daily activities (IADL Difficulty Scale)					
No difficulty	33 %	Some difficulty	50 %	Great difficulty	17 %

How do we compare to the rest of Canada?

The most frequently reported chronic conditions affecting Canadian seniors overall are:

- Hypertension (47%)
- Arthritis (27%)
- Hypertension and arthritis (14%)
- Hypertension and heart disease (12%)
- Hypertension and diabetes (11%)

The amount of health care that Canadian seniors need as they age is largely driven by the number of chronic conditions that they have, not their age.²⁰

These are just a few of the many findings contained in the report: *Seniors and the Health Care System: What is the Impact of Multiple Chronic Conditions?*

This publication is available from the Canadian Institute for Health Information: https://secure.cihi.ca/free_products/air-chronic_disease_aib_en.pdf

Acute care (hospital) services are an important part of the health care services continuum. This page provides a 5 year snap-shot of where residents received acute care services and a glimpse into the activities occurring at local facilities.

Location where inpatient hospital services were received: ²¹

For Prince Rupert LHA residents during the five year period: 2008/09 - 2012/13.							
Number of Cases and Days	Location of Hospital Care						Total
	Prince Rupert	Terrace	Kitimat	Other NH	Other BC	OOP	
Cases	7,811	319	79	258	1,327	45	9,839
Days	32,663	2,952	209	2,194	13,401	175	51,594

- ALC Alternate Level of Care. Clients who no longer need acute services and who are waiting to be discharged to a setting more appropriate to their needs.²²
- Cases These are inpatient cases - client was admitted to the facility.
- Days These are inpatient days - does not include days attributable to ALC.
- Other NH Care was received at a Northern Health facility other than those shown.
- Other BC Care was received at a non Northern Health facility in BC.
- OOP Care was received Out of Province – in most cases this means Alberta.

Facility Activities (selected measures).²³

No. 902 - Prince Rupert Regional Hospital					
Selected Measures	2008/09	2009/10	2010/11	2011/12	2012/13
Acute discharges/deaths total	1,984	1,948	2,121	1,995	1,939
